**Subject:** Please Support the Consensus Plan -- FCC WT Docket #02-55

**RECEIVED**

FEB 11 2004

Federal Communications Commission  
Office of the Secretary

Commissioner Kevin J. Martin  
Federal Communications Commission  
445 12th Street, SW  
Washington, DC 20554

Dear Commissioner Martin,

Emergency response communications have never been more critical, or more difficult.

That's because of a common problem on police, fire and EMS radios: interference. Interference, garbled or dropped communications, inhibits first responders from doing their jobs safely and effectively. Essentially, if first responders can't communicate, they can't help and may themselves be in danger.

There is a solution before the FCC: the Consensus Plan. Over 300 public safety organizations, local governments, and congressional officials support this Plan because it eliminates interference before it occurs and at no additional cost to federal, state or local budgets - or the American taxpayer.

The 300 Consensus Plan supporters that have filed with the FCC, along with John Walsh, host of America's Most Wanted, recognize the importance of communications for America's police, fire and EMS workers. This problem has existed long enough, and our first responders deserve better. I am asking you to help.

Please listen to the voices of public safety. Our neighborhoods, families and fellow public safety professionals cannot afford to wait any longer.

Sincerely,

Vicky Larsen  
5124 Boyd Drive  
Carmichael, California 95608-5008

cc:  
Senator Dianne Feinstein  
Senator Barbara Boxer  
Representative Doug Ose

Commissioner Jonathan S. Adelstein  
Federal Communications Commission  
445 12th Street, SW  
Washington, DC 20554

Dear Commissioner Adelstein,

My son is a Police Officer in Bellevue, Washington who willingly puts his life on the line every day. In fact, effective communication may well have saved his life 4 years ago while he was serving with the Edmonds, Washington Police Department. He responded to a man armed with a knife. The man did not put the weapon down and was aggressively approaching my son. With his weapon drawn and his exit nearly blocked, my son, Officer Christiansen called for back-up and fortunately, his Sargeant arrived almost immediately and struck the man with his car rather than shooting him. Without this communication, there may have been fatal consequences. Interference, garbled or dropped communications, inhibits first responders from doing their jobs safely and effectively. Essentially, if first responders can't communicate, they can't help and may themselves be in danger.

There is a solution before the FCC: the Consensus Plan. Over 300 public safety organizations, local governments, and congressional officials support this Plan because it eliminates interference before it occurs and at no additional cost to federal, state or local budgets - or the American taxpayer.

The 300 Consensus Plan supporters that have filed with the FCC, along with John Walsh, host of America's Most Wanted, recognize the importance of communications for America's police, fire and EMS workers. This problem has existed long enough, and our first responders deserve better. I am asking you to help. Emergency response communications have never been more critical, or more difficult.

I urge you to support the Consensus Plan.

Sincerely,

Cliff Christiansen  
East 4415 Lane Park Road  
Mead, Washington 99021-9425

cc:  
Representative George Nethercutt

The 300 Consensus Plan supporters that have filed with the FCC, along with John Walsh, host of America's Most Wanted, recognize the importance of communications for America's police, fire and EMS workers. This problem has existed long enough, and our first responders deserve better. I am asking you to help.

Please listen to the voices of public safety. Our neighborhoods, families and fellow public safety professionals cannot afford to wait any longer.

Sincerely,

**Subject:** Please Support the Consensus Plan -- FCC WT Docket #02-55

Commissioner Jonathan S. Adelstein  
Federal Communications Commission  
445 12th Street, SW  
Washington, DC 20554

Dear Commissioner Adelstein,

Emergency response communications have never been more critical, or more difficult.

That's because of a common problem on police, fire and EMS radios: interference. Interference, garbled or dropped communications, inhibits first responders from doing their jobs safely and effectively. Essentially, if first responders can't communicate, they can't help and may themselves be in danger.

There is a solution before the FCC: the Consensus Plan. Over 300 public safety organizations, local governments, and congressional officials support this Plan because it eliminates interference before it occurs and at no additional cost to federal, state or local budgets - or the American taxpayer.
